### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE \_\_\_\_\_ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_\_.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 22, 2006 has been entered.
2. This Office action is in response to the amendment filed December 22, 2006 in which claims 35-40 were added.
3. The rejections of the claims under 35 U.S.C. 103(a) are withdrawn in view of Applicant's arguments.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 28 and claims 35-37 are rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. Excess water is needed to initiate hydration is critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188

Art Unit: 1714

USPQ 356 (CCPA 1976). Applicant discloses at page 4, lines 12-15 that in accordance with this invention excess water is needed to initiate hydration.

6. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

7. Claims 6, 8, 12-14, 25, 32-34, 39 and their dependents are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 6 is rejected because there is no antecedent support for "dry ash".

Claim 8 is rejected because there is no antecedent support "the dry ash".

Claims 12, 32 and their dependents are rejected because the language "will produce" is not positive process language. Therefore, no agglomerate forms.

Claim 25 is rejected because it is not clear what happens to the drying agent.

Claim 39 and its dependent are rejected because there is no antecedent support for "said mixture".

8. Claim 38 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

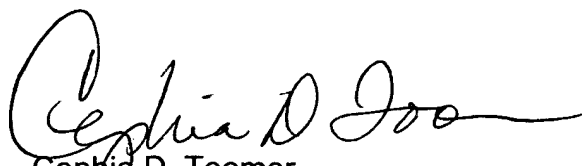

The prior art does not teach or suggest the claimed process wherein the water is present in an excess amount greater than the stoichiometric amount required to hydrate the ash.

9. Claims 17-24, 26, 27 and 29 are allowable because the prior art fails to teach or suggest reactivation of the ash by simultaneously grinding and hydrating the ash.
